Colour & Typeface & Space System

	Style Name	Weight	Size & Line Height	Typeface		Example
Heading	H1 Headings	Bold	42/64	Poppins	H1 Page title	**H1 Page title**
	H2 Headings	Semibold	28/42	Poppins	H2 Page title use for top navigation bar	**H2 Page title detail**
	H3 Headings	Medium	24/36	Poppins	Use for menu text	Menu text
	H4 Headings	Bold	20/30	Poppins	Title use for card heading	**Menu Title**
Body text	Body text	Regular	16/22	Roboto	Body text	express the meaning of (the writer or speaker or something written or spoken) using different words, especially to achieve greater clarity.
	Subtitle	Light	16/22	Roboto	Use for subtitle	**express the meaning of (the writer or speaker or something written or spoken) using different words, especially to achieve greater clarity.**
	Note	SemiBold	10/14	Roboto	Use for notes and caption.	express the meaning of (the writer or speaker or something written or spoken) using different words, especially to achieve greater clarity.
Label	Nav Bar (header)	SemiBold	28/44	Josefin Sans	Text use for headings	Nav Bar (header)
	Primary Button	Regular	16/24	Poppins	Text use for primary button	Primary Button
	Secondary Button	Regular	16/24	Poppins	Body text use for secondary button	Secondary Button
	Card Content	Regular	18/28	Poppins	Body text use for card content	Card Content
	Card Subtitle	Medium	18/28	Poppins	Subtitle for card content	Card Subtitle

Token name	Value	Usage	Examples
spacing-xs	4 px	Tight spacing within compact UI elements	Space between label and title in a card
spacing-sm	8 px	Small spacing within related content groups	Supporting text in heading, label to option list, text items in footer
spacing-sm-plus	10 px	Compact spacing between related content where 8px feels too tight	Navigation item gaps, subsection title to body content, compact button padding
spacing-md	12 px	Standard horizontal padding to provide comfortable click targets	Primary button horizontal padding, secondary button horizontal padding
spacing-md-plus	14 px	Comfortable inline spacing between navigation or branding elements	Primary navigation item gaps, logo-to-wordmark spacing
spacing-lg	16 px	Standard spacing for component interiors and grouped content	Card padding, input padding, grouped text/content spacing
spacing-lg-plus	20 px	Medium spacing between grouped component content	Grouped content rows, medium internal section spacing
spacing-xl	24 px	Standard block and section spacing	Title-to-body transitions, grouped section content, moderate vertical gap
spacing-2xl	36 px	Vertical spacing between major content sections	Intro block to timeline section, search area to results area
spacing-3xl	48 px	Large internal spacing within dense page layouts	About page content breaks, detail panel seperation
spacing-4xl	56 px	Large page-level spacing	Major section padding, strong layout separation
spacing-5xl	80 px	Maximum major layout spacing	Large page margins, major section spacing, wide padding

Theme Colors

Main colors used throughout the UI.

- **#FFFFF** White — Main Background Color
- **#1C3664** Navy 600 — Main Foreground Color / Button
- **#F6BE38** Gold 600 — Design Aesthetics

Secondary Colors

For items that require differentiation eg: status, notifications and other important information

- **#FFFBF2** Gold 50 — Secondary Background Color
- **#FDEECD** Gold 100 — Text Highlight
- **#F8C965** Gold 300 — Design Aesthetics
- **#F6BE38** Gold 600 — Design Aesthetics / Text Underline
- **#445078** Navy 400 — Design Aesthetics
- **#F2F2F5** Gray 200 — Button Color
- **#B30F14** Red 600 — Action required / Link (Semantic)

Neutrals

Used for functional purposes and accessibility standards

- **#000000** Black — Functional
- **#58595B** Grey 500 — Functional
- **#808285** Grey 200 — Functional
- **#F2F2F5** Grey 300 — Functional, Background
- **#E6E7E8** Grey 100 — Functional
- **#FFFFFF** White — Functional

Use of Colors

The combination of colors within a theme page layout should always be:

- Navy 600 as the foreground heading text color and White as the background.
- Rarely use black on white unless its a highlight text

Highlighting elements and main buttons should include Navy 600 as the background color and white as foreground text.

In addition, secondary colors can be utilized as background colors for elements that require differentiation.
